Lecture for the 2nd year of the international conference:

TRENDS IN THE EUROPEAN ENERGY INDUSTRY

23TH - 24TH OF MAY 2011, PRAGUE

National Technical Museum, Kostelní street no. 32

Author: Piotr Piela

Title of the lecture:

Study - Central Europe Energy Partners - proposition for the EU-10 countries

Abstract:

Against this picture we propose to form the EU-10 initiative under working name „Central Europe Energy Partners” in order to undertake joint and coordinated actions of the EU-10 countries with respect to the energy policy at the European Union arena. Such alliance of the EU-10 region should have strong leverage on decisions of the European Commission. It will be beneficiary for the region to form this initiative relatively quickly in order to take advantage of the Hungarian and Polish presidencies in 2011.
